## 7.3 Institutional Distinctiveness

### 1. Platform for Placements

GIET Engineering College has raised the placement of its flag high. Students are sculpted beginning in their first year of study with well-designed training through different off-line and online programmes to keep the learners on track catering to the demands for employment in the training process in addition to academics. Much focus is placed on skill development, which helps students enhance their technical, logical, analytical, and verbal skills. Above all, it develops an individual's personality so that he or she is confident and capable of seizing the chance. A partnership cell with six training institutes has been formed. Mock interviews, for example, allow the learner to experience and comprehend the requirements for the interview and job.

### 2. Green Cover zone – Sustainable Environment

GIET Engineering College are very well spread around 10.43 acres of land in Rajanagaram, East Godavari Dist. One of the most captivating aspects of the institution is its magical ambience and beauty, which truly immerses one in it. The well managed plants and flora fauna found in the college grounds obviously speak volumes about the college's sustainable environment. To preserve a sustainable environment, waste management is carried out in accordance with government regulations, from garbage collection to waste disposal, while keeping the abundance of soil and the living environment in mind. Understanding the urgency of water shortage, the institution took a significant step toward minimizing water usage. Raw water from RO plants and household water discharged at the college are sent to the gardens and mango grove. To preserve a clean, green, and healthy environment, the institution maintains a policy that prohibits the use of plastic.

### 3. Faculty Club- Integrity and Sustainability

To maintain integrity and sustainability, GIET Engineering College formed the Faculty Club. The faculty club's mission is to look after the well-being of professors and students in need. Faculty club also assists impoverished students in various aspects, such as paying university test fees, purchasing notebooks, and covering medical expenditures for poor students and family members, as well as faculty members in need of funds. We provide blood donation to anyone in need through our group.

### **4. Digital Suite – Academics and Administration**

Since a decade, the field of Teaching, Learning, and Management has launched on a digitized Platform for academics and administration, empowering students to obtain information and skills, monitoring academic performance, earning jobs, and facilitating touch-free fee payment services. Taking the lead in bridging the gap in the teaching and learning process along the lines of development and modes of learning, our institution is committed to excellence in encouraging quality teaching-learning, research, training, and assessment through the Digital Suite, which includes LMS, Digital Content videos, Microsoft Office 365, E-Cap. Digital videos allow students to participate in individualized classroom learning that instills information and hands-on experience while motivating them to be capable, creative, competent, and marketable. The digital platform also allows teachers and students to learn about different curricular, co-curricular, and extracurricular activities.
